EXPERIENCE (8+ Years)

- **Senior Software Engineer | 2 Year 3 Months**
Zynga | Bangalore | November 2021 - Present
Working in FarmX's engineering team. We develop games on Unity engine with C#. Our responsibilities are to implement the core game logics, control various moving game objects, maintaining scores and rewards, handling actions and events in the game.
- **Senior Software Engineer | 5 Years, 4 Months**
Kony India Pvt. Ltd. | Hyderabad | April 2016-Aug 2021
Worked with one of the progressive and proactive team and played several critical roles as full stack developer. Build and delivered multiple enterprise products from scratch and gained good exposures on my problem-solving abilities, analytical thinking and coding.
- **Full Stack Developer - Entrepreneur | 9 Months**
Aayna-Beauty Services at Doorstep | Hyderabad | July 2015 – March 2016
Led the entire technology aspects implementation for a startup-based company where I learned to stay proactive, motivated, a problem solver and a better programmer.

PROJECTS

- **FarmVille 3 – A mobile game | Zynga | Nov 2021 – present:** It is simulation of a farmer's life on your fingertips. Very engaging by offering various features such as – crop seeding/harvesting, nourishing animals like cows, hens, pigs, bear, deer. You can build factories to produce dairy products and windmills to process the grains.
Skills: C#, Unity engine
- **Desk-IN – Desk Reservation System | Kony Labs | May 2021 – Oct 2021:** Considering the covid situation where all the offices work in limited capacity, limited number of employees are allowed, and they need to have a specific desk reservation before coming to office. We made it possible by building the system with many features.
Skills: Schema Design, Salesforce, APEX, REST, SOAP, JavaScript, HTML and CSS
- **Merge Doc – Commissions | Kony Labs | Nov 2020 – April 2021:** Build a system which allows defining various document templates with various fields from different tables as placeholders. Generate PDF document from template for purposes such as releasing Offer letters, generating commissions letter along with different approval workflows.
Skills: Salesforce, APEX, REST, SOAP, JavaScript, HTML and CSS
- **Financialforce | Kony Labs | Mar 2018 – Jan 2020**
A project management tool to track entire lifecycle of project execution at Kony. This gives the ability to track efforts, expense and revenue at resource level as well as at project summary level along with billing customers and invoicing.
Skills: Salesforce, APEX, REST, SOAP, JavaScript, HTML and CSS
- **Base Camp (Customer Community Cloud) | Kony Labs | Jul 2017 – Present**
A self-service portal for Kony customers' (12K+ users) guidance with modules - Public and Private Forum, Knowledgebase, Ideations, Articles, Case management, Release info and Production Documentation.
Skills: Salesforce, APEX, REST, SOAP, JavaScript, HTML and CSS
Site: <https://basecamp.kony.com/s/>
*Forrester rated Base Camp 5.0/5.0 under category training & community (Q1 2019).
